

Renault Paint Codes - 60s, 70s and '80s

This page is just an initial guide to what colours the paint codes refer to. **The images do not accurately represent the paint colours.** That's why I'm replacing the swatches with photos of real cars. If you can help with a photo of your Renault (doesn't need to be a Renault 4) please email malcolm@renault4.co.uk.

I've referenced the guide at <http://www.ingo-heitel.de/lackierungen.htm>. Colours described in bold are either mentioned as R4 colours in that guide, or have been found to be Renault 4 colours. Colours not in bold were used on other classic Renaults, but possibly not the R4. R4-4L has given me permission to link to their [gallery of teintes](#) (colours).
